JBIS Journal of the British Interplanetary Society

VOLUME 47 1994

INDEX

EDITORS	*THEMES*
H. Benaroya	Lunar Industrialization and Colonization
B. Burkhalter and M.F. Rose	Support of the University Community of Space Science and Technology
L.J. Carter	Advanced Rocket Technology
C. Dyer	The Earth-Space Environment (Part I)
H-J Fischer	S.O.S. and D-2 Spacelab Operations
R. Hall	Soviet Astronautics
C. Maccone	Space Missions and Astrodynamics (Part I)
C. Maccone	Space Missions and Astrodynamics (Part II)
F.I. Ordway III	History of Rocket Development
F.I. Ordway III and F.H. Winter	Pioneering Rocketry and Spaceflight (Part IV)
S. Santoli	Exobiology (Part III)
S. Santoli	Nanotechnology (Part II)

AUTHOR INDEX

Amon D.M.	The Impact of Molecular Engineering on Spacecraft Information Systems	303
Akiba R. & Matogawa Y.	Educational Activities of the Institute of Space and Astronautical Science	467
Antona E. Surbone G. & Arnata G.B.	Engineering Features of Interplanetary Missions which Precede Extraplanetary Missions	485
Askew R.F. & Burkhalter B.B.	Commercial Development of Space: The Key to Future Technology	408
Belbruno E.	Ballistic Lunar Capture Transfers Using the Fuzzy Boundary and Solar Perturbations: A Survey	73
Bevilacqua F & Cesare S.	A Project for a Solar Sail Propelled Spaceship	57
Bond R.A., Pearce A.J. & Martin A.R.	Space Plasma Interactions with High Voltage Solar Arrays and Large Structures	143
Clark P.S.	Space Debris Incidents Involving Soviet/Russian Launches	379
Crowther R.	The Trackable Debris Population in Low Earth Orbit	128
Dewar J.A.	Atomic Energy: The Rosetta Stone of Spaceflight	199
Dyer C.	Cosmic Rays and Energetic Particle Effects	151
Fischer H-J & Friedl K.	A Survey of the German Spacelab Mission D-2	256
Fischer H-J. & Zoeschinger G.A.	Planning and Co-ordination of Space Shuttle Attitudes and Trajectory for Spacelab Mission D-2	260
Gabriel S.B.	Spectral Form of the Large Solar Proton Events of Solar Cycle 22	159
Galushkin A.I. *et al*	The Quantum Neurocomputer	331
Gardner F.J.	Nuclear Power for Deep Space Missions	215
Gnadl K & Friedl K.	Telescience Operations Support on Spacelab D-2	282
Griffin M.D. & Claybaugh II W.R.	The Cost of Access to Space	119
Harvey B.	The New Cosmodrome at Svobodny	373

Harvey B.	Rendezvous and Docking Difficulties in The Soviet Manned Space Programme	355
Heidmann J.	SETI in Europe: A Synopsis	71
Iwata T.	Evolutionary Scenario of Lunar Manufacturing	539
Johnstone A.	The Space Laboratory of University College London	431
King-Hele D.	Introduction	127
Luskinovich P.	Stages of Technical Evolution	343
Lysenko S.	Stability of Microorganisms Isolated from the Stratosphere and the Mesophere to the Action of Low and Ultralow Temperatures	19
McDonnell J.A.M.	Kent in Space: Cosmic Dust to Space Debris	442
McDowell J.C.	The Scout Launch Vehicle	99
Maccone C.	The Karhunen-Loève Transform: A Better Tool than the Fourier Transform for SETI and Relativity	5
Maccone C.	Recent Developments on Space Missions to the Solar FOCI	509
Maccone C. & Matloff G.L.	SETISAIL: A Space Mission to 550 AU to Exploit the Gravitational Lens of the Sun for SETI and Astrophysics	3
Maccone C.	Space Missions Outside the Solar System to Exploit the Gravitational Lens of the Sun	45
Maron V.I.	An Evolutionary Game with Biased Dice	27
Martin A.R.	A Review of Spacecraft/Plasma Interactions and Effects on Space Systems	134
Matloff G.L.	On the Detectability of Several Varieties of Low-Energy Starships	17
Matloff G.L.	Solar Sailing for Radio Astronomy and SETI: An Extrasolar Mission to 550 AU	476
Mendell W.	The Fourth Wave	515
Messerschmid E.W.	Support of the University of Stuttgart for Space Science and Technology	414
Moore V., Lucek E.A., Sime, D.G. & Harrison R.A.	The Study of the Solar Wind Using Interplanetary Scintillation Observations from the MRAO, Cambridge, Array	164
Morgan C.R.	Terraforming with Nanotechnology	311
Nussinov M.D. & Lysenko S.V.	Again on Isolated Cells and Spores of Microorganisms "Exploding" on the Earth Orbit	37
Nussinov M.D., Lysenko S.V., Pogodin Yu. S. & Stefanovich N.E.	Detection of Microbial Life on Mars with the Aid of Apparatus Operating on a Charge-Coupled Device Matrix	31
Nussinov M.D., Maron V.I. & Santoli S.	The Evolutionary Soliton-Like Impulse Paradigm of Matter: Perspectives of Unity in the Nanotechnology/Nanobiology Dichotomy	321
Nussinov M.D.	On the Experimental Investigation of the Origin of Biopolymer Chirality	23
Nussinov M.D., Lysenko S.V. & Patrikeev V.V.	Terraforming of Mars through Terrestrial Microorganisms and Nanotechnological Devices	319
Podnieks E.R. & Siekmeier J.A.	Role of Mining in Lunar Base Development	543
O'Dale C.D.	Commercial Activities Resulting from a Lunar Base	549
Ordway III F.I., Sharpe M.R. & Wakeford R.C.	EMPIRE: Early Manned Planetary-Interplanetary Roundtrip Expeditions Part II: Lockheed Missiles and Space Studies	181
Orta R. Savi P. & Tascone R.	Analysis of Gravitational Lens Antennas	53
Osadchi V.M. & Yudo O.A.	The Concept of a Nuclear-Laser Rocket Engine	239
Palutan F.	Stability and Control Problems in Earth-Moon Lagrangian Point L2	497
Pannunzio R.	The Hipparcos Astrometric Satellite and Visual Double Stars	505
Petrakov V.M.	Two Projects of V.M. Myasishchev	347
Petrakov V.M.	Soviet Orbital Stations	363
Podnieks E.R. & Siekmeier J.A.	Role of Mining in Lunar Base Development	543
Pooley S.J.	The Development of the 3-Inch British Military Rocket	123
Popov G.A., Shishkin G.G. & Malyshev G.V.	Space Research Activities of Moscow State Aviation Institute (MAI) and Research Institute of Applied Mechanics and Electrodynamics (RIAME)	453
Powell J.W. & Scala K.J.	Historic White Sands Missile Range	83
Rabeneau E. & Kruse W.	Telemetry Processing for the Second German Spacelab Mission D-2 at the German Space Operations Center	277
Raitt W.J.	Space Science and Technology at Utah State University	462
Rausch W. & Helbig M.	TV Operations from the German Space Operations Center (GSOC)	290
Rothmund C.	An Overview of the History of French Sounding Rocket Programmes	109
Santoli S.	Developing the Concept of a Rigid-Link Nanorobotic Arm Working in a Dense Fluid	341
Santoli S.	How Far Could We Make Ourselves Understood by the Andromedans? - An Evolutionary Cybernetic Problem in Hierarchical Dynamics	11
Santoli S.	Short-Lived Dissipative Nanostructures in Solids: Did Phase-Ordered Phonons Contribute to Biopolymer Evolution?	33
Santoli S.	System-Level Physics of Autonomous Nanorobots for Hard Chemistry and Wave Packet Engineering	335
Schencking A. & Wüsten H.	Payload Data Coordination	266
Schmitt H.	Lunar Industrialization: How to Begin?	527
Sheka E. *et al*	Computer Modelling in an Electric Field: Nanometric Design with	

	Scanning Tunnelling Microscope	325
Shuklin M.V.	Effectiveness of Resupply for Reduction of Mass of Interstellar Transport System (ITS)	245
Smith C.J. & Lämmel G.	The NASA/GSOC Data Transfer System for the Second German Spacelab Mission D-2	272
Solem J.C.	Nuclear Explosive Propulsion For Interplanetary Travel: Extension of the MEDUSA Concept for Higher Specific Impulse	229
Spengler H. & Friedl K.	Voice Communications in Mission Operations Control Centers	288
Sterner E.	Dual Use Technology and Near Term Lunar Exploration: The Clementine Program	521
Sterner E. & Benaroya H.	Lunar Industrialization and Colonization: Towards a Policy Framework	516
Strobl J.	The Hollow Body Solar Sail as a Possible Transporter of A Radio Telescope	67
ten Cate H.	NASA's University Programs	395
Tikhonravov M.K.	The Creation of the First Artificial Earth Satellite: Some Historical Details	191
Vick C.P.	The Mishin Mission, December 1962 - December 1993	357
Vick C.P.	NPO Energiya Details on Block-D/DM Comsat Stage Revealed	377
Voevodin S.A.	Cosmonaut Status	375
Weiss S.I.	Space Science and Technology at the Massachusetts Institute of Technology	427
Winter F.H.	The Copenhagen Rocket Bombardment of 1807: Some New Views of Early Rocket History	171
Woodcock G.	Economic and Policy Issues for Lunar Industrialization	531
Yilin Z.	China's Early Space Activities	195
Zubrin R.M.	The Methane-Acetylene Cycle Aerospace Plane: A Potential Option for the Inexpensive Earth to Orbit Transportation	241

SUBJECT INDEX

Apollo Missions 544
Asteroid Mining 553
Astrodynamics 43,473
Astrometry 505
Astrophysics 3,480
Biological Evolution 321
Biopolymers, Evolution 33
  Origin of Chirality 23
Chemical Evolution 23,27
China, Early Space Activites 191
Commercial Development of Space 408
Control Centre, Telemetry Processing 277
  TV Operations 290
  Voice Communications 288
Cosmic Ray and Energetic Particle Effects 151
Cosmodrome, At Svobodny 373
Cosmonauts 375
Data Transfer 272
D-2 Spacelab Operations 256 *et seq.*
Earth-Moon, Lagrangian Point L2 497
  Transfers 73,78
  Transportation Costs 73,78
EMPIRE Studies 181
ETI 11
Euromir 94 390
Evolution, Biopolymers 33
  Chemical 23,27
  Molecular 27,321
  Technical 343
Exobiology 2
  Report of ISSOL '93 26
Gravitational Lens 3,45,53,67
High Temperature Technology 414
Information Processing 12
Institutes, ISAS, Japan 467
  MIT 427
  Moscow State Aviation (MAI) 453
  RIAME, Moscow 453
Interplanetary Scintillation Technique 164
Interstellar Flight, Resupply Effectiveness 245
Karhunen-Loeve Transform 5
Lagrange Points 78,497
Launch Vehicles, French 109
  Pegasus 77
  Scout 99
Lunar, Capture 73
  Commercial Activities 549
  Exploration 521
  Industrialization & Colonisation 357 *et seq.*
  Economics and Policy 531
  How to Begin ? 527
  Prospects 547
  Manufacturing 539
  Mining 543
  Solar Power Generation 552
  Soviet Manned Mission 357
  Transport 535
Mars, Terraforming 319
MEDUSA Project 229
Microorganisms, Detection on Mars 31
  In Earth Orbit 37
  Survivability 19
  Terraforming Mars 319
Mir 370
Mishin, V.P., Mission 1962-1993 357
